Student Mart Website

Description:

• This web application facilitates selling and purchasing of Goods among users .

• Seller can display the goods which they have for selling in the website.

• Buyer can buy the goods displayed, add to cart through a payment gateway or through

cash. •User will be able to advertise goods and buy them through different categories.

• The admin would be able to manage the application and handle complaints from users.

Significance:

· There are many students who would like to sell and buy used goods of other students.

· This web application will ease the user's hassle to sell and purchase goods from other users who want to sell their products.

· Easy communication is established between different users.

Users:

· **Seller** : The person who would like to sell the Goods.

· **Buyer** : The person who would like to the Goods.

· **Admin** : The person who can manage the application.

User Stories:

Seller:

· As a Seller, I want to Register/ Login into my account to advertise the Goods I want to sell.

· As a seller , I want display picture for my account and add details like name, Contact no. (Optional) for buyers to view and contact the seller.

· As a seller, I want to add pictures , Videos and description of the Goods I would like to sell.

- As a seller, I want to have Payment Gateway to sell the Goods .

- As a seller, I want to display the original price of the Goods and selling price, I want to display if the product is sold or not.

- As a seller I should be able to report to admin.

Admin:

- As an Admin, I want to be able to remove items from stores so that no illegal/inappropriate item will be allowed in the store.

- As an Admin, I want to be able to ban users that have scammed/sold fake items on the store

- As an Admin, I want to be able to see a admin page which gives information on how many people visited the site.

- As an Admin, I want to be able to chat with any users who may have issues on the site via message api

- As an Admin, I want to be able to email all users information about the site such as maintenance or any special promos.

Buyer:

- As a buyer, I want to login to the web application , so that I can view, compare and buy items ment for selling.

- As a buyer, I want to give reviews and ratings to buyer and his product.

- As a buyer, I want to have an option to share the product details via mail/twitter etc.

- As a buyer, I want to get details of the product, so that I can compare it with my requirement and I want to add the product to my cart or whishlist.

- As a buyer, I want a secured way of payment.
